

PERFORMANCE • SERVICE • VALUE

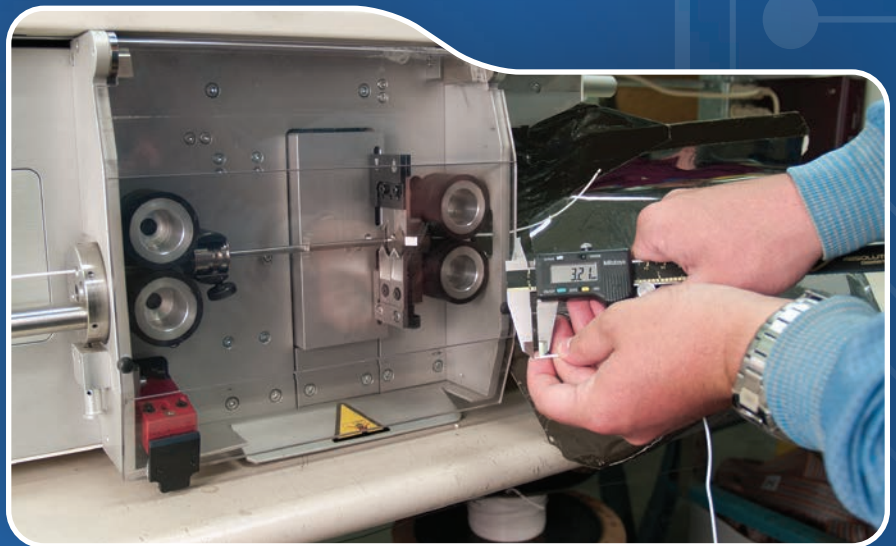

Board Level Smarts For High Level Performance

Our top-of-the-line equipment, regularly calibrated by independent specialists in strict accordance with all applicable National Institute of Standards and Technology (NIST) requirements, enables us to handle more technologically advanced systems. Our flexible and responsive customer-driven service is pivotal to our success. We have been mentored by the best and trained to excel, whether in prototyping, small runs or production runs that exceed a year.

Our specialties include:

- **Low/Mid Volume, High Mix**
- **Point-to-Point Wiring**
- **Wave Soldering**
- **Conformal Coating/Encapsulation**
- **Automated DE Fluxing System**
- **Automated Optical Inspection (AOI)**
- **Automated Axial Insertion**
- **Ionic Contamination Testing**
- **In-Circuit Test and Flying Probe Testing**
- **Black Box Functional Testing**
- **Thermal Testing**

Hands-on is how we like to work and on-target is how we aim to deliver
